Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 5, 10, 11-13 and 18-20 are objected to because of the following informalities: The reference numbers should be removed since they do not appear to be associated with any particular structure and are not in parenthesis. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 5 and 11-13 recite a mechanism "involving jaws." It is not clear what is meant or encompassed by this statement. Are jaws required? If so, how are they involved with the mechanism?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5, 7, 9-13 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US 1730077 issued to Isachsen. Isachsen discloses a retractable

Art Unit: 3641

structure comprising a flexible element 32, traction member 33, 34, centering means 23, 24, a mechanism 3, a pin 6 and bolt 8.

6. Claims 1, 2, 3, 6, 8, 14, 15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3285445 issued to Broziat which discloses a crane comprising a vehicle in the form of a truck, a crane attached to the truck, a winch 17, cable 14 and a load hook 13.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Broziat in view of US 2746586 issued to Van Doorne. Broziat discloses an interface as discussed above. However, Broziat does not disclose a feature that would allow the hook 13 to come into register with another element. Van Doorne discloses a hook attached to a cable via a male conical element 108 that registers, when retracted, with a female conical member 109. At the time of the invention, one having ordinary skill in the art would have found it obvious to provide the interface of Broziat with the registering system of Van Doorne. The suggestion/motivation for doing so would have been to lock and secure the hook to the crane structure.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on form PTO-892 are cited as of interest to show similar interface structures. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Troy Chambers whose telephone number is 571-272-6874 and whose email address is troy.chambers@uspto.gov.
